

ORTHO CREATION · FIELD WORK

Guide for Field Executives

Everything you do in a day — start your day, visit clinics, write down the cases the doctor gives you, collect payment, and close your day. One screen, one button at a time.

For Field Executives only · Works on your phone · Odoo 19

A. Before you begin

Three things, once.

- **Your login and password.** The office gives you these. They are yours — do not share them.
- **Location must be ON.** The app records where you are when you reach a clinic. If location is off, you cannot start a visit.
- **Use your phone's browser** (Chrome). You do not need a computer for any of this.

You only see your own work

Your visits, your travel, your cases, your money, your target. You cannot see another executive's records, and they cannot see yours.

B. Your day, from start to finish

This is the whole loop. Everything else in this guide is one of these eight steps explained.

1

Start my day

Mark attendance

2

Starting km

Odometer + photo

3

Go to a clinic

From your list

4

I'm Here

Tap when you arrive

5

Write the cases

One slip per patient

6

Finish Visit

Say what happened

7

Next clinic

Repeat 4 to 6

8

End the day

Closing km, clock out

1. Sign in

The screenshot shows a mobile app's sign-in screen. At the top is a header with 'Your Logo' and a menu icon. Below is a form with three main sections: 1. Email: A text box containing 'abhijith' with a red circle '1' next to it. 2. Password: A text box with dots, a 'Reset Password' link, and an eye icon to toggle visibility, with a red circle '2' next to it. 3. Log in: A purple button with 'Log in' text, with a red circle '3' next to it. Below the button is a '- or -' separator and a 'Use a Passkey' button with a QR code icon. At the bottom is a dark blue footer with 'Useful Links' and a list: Home, About us, Products, Services, Legal, Contact us.

The sign-in screen

- 1 **Email or username** — the one the office gave you.
- 2 **Password** — tap the eye at the end of the box if you want to check what you typed.
- 3 **Log in.**

Sign in once

Your phone will stay signed in. You do not have to type this every morning.

2. Find Field Work

After signing in you land in **Field Work**. These are the only menus you have, and every one of them is about your own work.

MENU	WHAT IT IS
My Day	Today's clinics and every button you need. This is the screen you live on.
My Day Sheets	Your finished days, after your manager has looked at them.
My Visits	Every clinic visit you have made.
My Cases	Every case slip you have written.
My Travel	Your daily kilometres and travel claim.
My Deliveries / My Work to Deliver	Work you are carrying out to clinics.

On a phone, you do not need the menu

Everything above is also a button on **My Day**. Open My Day in the morning and stay there all day.

3. The My Day screen

My Day, first thing in the morning

- 1 Today's date.** Use the arrows beside it to look back at the last few days if you forgot to write something up. You can never move forward to tomorrow.
- 2 Your day so far** — visits done, cases registered, case value, money collected. These fill in by themselves as you work. You never type them.
- 3 Start my day.** Nothing else works until you press this.
- 4 DO — the things you do at the door:** travel, quick entry, track an order, look up a doctor, scan, deliver, collect.
- 5 MY — your own pages:** visits, cases, travel, cash, targets, deliveries.

4. Start my day

After pressing Start my day

Press **Start my day**. The card turns green.

- 1 **On duty**, with the time you started and how long you have been working.
- 2 The same button now says **End the day**. Press it only when you are finished for the day.

If it says "Not set up for attendance"

Your login is not linked to your employee record. Ask the office or HR to fix it — you cannot do it yourself.

5. Write down your starting kilometres

Do this before you leave, while the bike is still in front of you.

The screenshot shows a mobile application interface for a field executive. At the top, there's a navigation bar with a back arrow, a home icon, and a status bar. Below this is a header with a 'Start the Day' button and a 'Not Started' status. The main form is titled 'New' and displays '0.00 km • 0.00 ₹'. It includes a dropdown for 'Executive' (Abhijith) and a date field (Sep 12). The 'Vehicle' section has three options: 'Two Wheeler' (selected), 'Four Wheeler', and 'Public Transport'. Below this is the 'ODOMETER' section with a 'Start Reading' field (0.00) and a 'Start Photo' field with a camera icon and 'Take a photo' text. At the bottom are 'Discard' and 'Save' buttons.

Tap "Start the day" under DO

- 1 **Vehicle** — Two Wheeler, Four Wheeler or Public Transport. This decides the rate you are paid per kilometre.
- 2 **Start Reading** — the number on your odometer right now.
- 3 **Start Photo** — take a photo of the odometer.

The screenshot shows a mobile application interface for recording a day's work. At the top, there are navigation icons and a status bar. Below the navigation bar, there are two buttons: "Start the Day" and "Not Started". The main form is titled "New" and contains the following fields and options:

- 0.00 km • 0.00 ₹**: Distance and cost.
- Executive**: A dropdown menu with the value "Abhijith".
- Date**: A date picker showing "Sep 12".
- Vehicle**: Three radio button options: "Two Wheeler" (selected), "Four Wheeler", and "Public Transport".
- Rate / km**: A text field with the value "3.00".
- ODOMETER**: A section with two fields:
 - Start Reading**: A text field with the value "46210".
 - Start Photo**: A photo field showing a photo of a meter reading "48210".

At the bottom of the form, there are two buttons: "Discard" and "Save".

Filled in

- 1 The reading typed in.
- 2 The photo taken.
- 3 Press **Save** — the big green button at the bottom.

Then press **Start the Day** at the top of the form.

Your travel is now running

- 1 The status reads **On the Road**. Your kilometres are being counted from here.

The photo is not optional

If you skip it you will see "**A photo of the opening reading is required.**" Take the photo and press Start the Day again.

6. Today's clinics

One card per clinic

Scroll down past the buttons. Every clinic on your round today is a card, in order.

- 1 The clinic name**, the town, and why you are going ("Routine Round").
- 2 The address**, and three shortcuts: **Navigate** opens your map app, **Call** rings the clinic, **Chat** opens WhatsApp.
- 3 The button on the right**. It always does the one right thing for that card — you never have to choose.

On a phone the button shows only a picture

 = I'm Here ·  = Finish ·  = View (already done)

You can also tap the card itself to open the full visit.

"Nothing planned for today."

Your round has not been set up. Ask your manager to plan your beat — then your clinics appear here every morning on their own. You never create a visit to say you intend to go somewhere.

7. At the clinic — press "I'm Here"

Press it when you are standing at the clinic, not in the car on the way.

After pressing I'm Here

- 1 The card now says **At clinic**.
- 2 The button has become **Finish** (✓) for when you are leaving.

"Location is off"

Turn on Location for your browser, wait a moment for the arrow to appear at the top of your phone, then tap again. A visit cannot be started without it.

If you are far from the clinic

You are **never blocked**. The visit records that you checked in away from the clinic, and asks you for a short reason before you can close it — for example "met the doctor at their other branch". Write the truth; it is a note, not a punishment.

"GPS not checked — this clinic has no location on the map"

You will see this on most clinics today, and it is not your fault: almost none of them have been pinned yet. Your check-in is still recorded — the app simply cannot say how near you were.

If you are standing in the clinic, open the visit and press **Pin Clinic Here**. That fixes it for you and for everyone who visits after you.

8. Write the cases the doctor gives you

One slip per patient. Fill it in while the doctor is still in front of you.

The visit, now open

- 1 **Finish Visit** — do not press this yet.
- 2 **The three dots.** On a phone the other buttons hide here. Tap it and choose **Add Case**.
- 3 **Purposes** — tap as many as apply: routine round, case collection, delivery, payment, complaint, new doctor, marketing.

The screenshot shows a mobile app interface for creating a new case slip. At the top, there's a status bar with various icons. Below it, a navigation bar contains a 'Submit Case' button and a 'Being Entered' status indicator. The main form is divided into sections. The 'PATIENT' section includes a text field for 'Patient name' (callout 1), a numeric field for 'Age' (callout 2) with minus and plus buttons, a radio button selection for 'Gender' with 'Male' and 'Female' options (callout 3), and a radio button selection for 'Priority' with 'Low', 'Normal' (selected), 'Urgent', and 'Emergency' options (callout 4). Below this is a section titled 'WHAT IS BEING MADE' with a warning message: 'Add at least one item — a case with no work on it cannot be saved.' It features a table with columns 'Work', 'U/L', 'Qty', and 'Colour'. A callout 5 points to an 'Add a line' button in the table. At the bottom, there are 'Discard' and 'Save' buttons.

A new case slip

- 1 **Patient name.**
- 2 **Age** — use the – and + buttons, or tap the number and type it.
- 3 **Gender.**
- 4 **Priority** — leave it on Normal unless the doctor asks for it faster.
- 5 **Add a line** — this is where you say what is being made.

Choosing the appliance

A full-screen list of everything the lab makes opens.

- 1 **Tap the appliance** the doctor asked for. Use the search icon at the top if the list is long.

The screenshot shows the Ortho Creation app interface. At the top, there's a navigation bar with a home icon, a back arrow, and the text 'F.. ← Meer...'. Below this is a toolbar with a '+' icon, a settings gear, and navigation arrows. A 'Submit Case' button is highlighted with a red box and a '2' in a red circle. To its right is a 'Being Entered' button. The main section is titled 'PATIENT' and contains the name 'Meera Krishnan'. Below the name is the address '32 Diamonds Modern Dental clinic • Sep 12'. The 'Age' field is set to '14'. The 'Gender' field has 'Male' and 'Female' (selected) buttons. The 'Priority' field has 'Low', 'Normal' (selected), 'Urgent', and 'Emergency' buttons. Below this is a section titled 'WHAT IS BEING MADE'. It contains a table with columns 'Work', 'U/L', 'Qty', and 'Colour'. The first row is highlighted with a red box and a '1' in a red circle. It shows '[OCF-C1] ...' in the 'Work' column, 'Upper' in the 'U/L' column, '-' in the 'Qty' column, and '1' in the 'Colour' column. Below the table is a dropdown menu showing '[OCF-C1] 3D - Lingual arch-Elgiloy wire'.

The work is on the slip

- 1 **The line.** Set **U/L** (upper arch, lower arch or both), the **quantity**, and the **colour** if the doctor chose one. Add another line if there is more than one appliance.
- 2 When the slip is complete, press **Submit Case**.

"Add what is being made ... a case with no work on it cannot be saved."

You have not added a line yet. Go back to **Add a line** and choose the appliance.

PATIENT

Meera Krishnan

32 Diamonds Modern Dental clinic • Sep 12

Age

14

Gender

✓ Female

Priority

 Visit Date
 Sep 12
 Beat
 EKM1 — Daily Round

AT THE CLINIC

Check In
 Sep 12, 8:25 PM

- 1 The visit is **Completed**. Your case slips have gone to the office as orders, and they are being checked now.

You can still fix what happened

On a completed visit you may still change the number of cases, the outcome chips and the payment — because those are often settled a minute after you walk out. Everything else is locked.

10. Check your numbers, then move on

- 1 Your day so far** — 1 of 5 visits, 1 case registered, the case value and the money collected. All of it counted for you.
- 2 Your target ring** — how much of this month's number you have reached.

Go to the next clinic and repeat steps 7 to 9.

After the first clinic

The clinic you have finished

- 1 The finished clinic is marked **Done** and moves to the top of the list, with what it produced — the cases and the money — on the card.

11. The other buttons

Track order — "where is my patient's work?"

Track order

The question every doctor asks at the counter. Tap

Track order .

- 1 **Type anything you know** — the patient's name, the clinic, the appliance, or the order number.
- 2 **The answer.** Tap a row to see the full journey: confirmed, in the lab, work finished, out for delivery, delivered, invoiced — with who made it.

Only work that is still open appears. Finished and invoiced jobs are not listed.

Doctors / Clinics — who else is on this road

- 1 A clinic on your route**, with what it still owes and how many orders are open. Tap the star to keep your regulars at the top.
- 2 New visit** adds that clinic to today, even if it was not on your plan. Use this when you make an extra stop.

Doctors / Clinics

Quick entry — many cases at once

The screenshot shows the 'Quick Case Entry' form with the following elements and callouts:

- 1** Doctor / Clinic (dropdown menu)
- 2** Entry Date (text field, showing 'Sep 12')
- 3** Executive (text field, showing 'Abhijith')
- 4** Submit all for verification ? (checkbox)
- 5** Patient, Appliance, U/L, Priority (table headers)
- 6** Add a line (button)
- 7** Create Cases (button)
- 8** Cancel (button)

Patient	Appliance	U/L	Priority
Add a line			

Quick entry

For the evening, when you have eight impressions in the bag from one doctor and do not want to open eight slips.

- 1 Doctor / Clinic** — choose it once.
- 2 One line per patient** — name, appliance, U/L, priority.
- 3 Submit all for verification** — leave this ticked.
- 4** Press **Create Cases**.

Same day, please

If you enter cases days later the app asks you to give a reason. Enter them the day you collect them and it never asks.

Cash in — money with no visit behind it

What was this payment for?

No visit is needed — use this for money taken at a door you did not raise a visit for. It counts in today's collections and towards your target straight away, and cash goes into your float.

Record

Cancel

Cash in

Money does not always arrive with the paperwork. A doctor settles an old bill while you are there for something else, a receptionist hands you an envelope on the way past, somebody pays for a case another executive delivered last week.

Before, the only way to record that was the payment box on a visit — so you had to invent a visit that never happened. Now you do not. Tap

Cash in under DO.

- 1 Which doctor or clinic** the money came from.
- 2 How much.**
- 3 How it was paid** — Cash, Cheque or UPI / Online.

What was this payment for?

No visit is needed — use this for money taken at a door you did not raise a visit for. It counts in today's collections and towards your target straight away, and cash goes into your float.

2
Record
Cancel

Filled in, ready to record

- 1 The amount.** Add a note if it helps — "old bill settled at the door".
- 2** Press **Record**.

It counts everywhere, straight away

The same three facts a visit records, so it counts the same: in today's collected total, on your day sheet, towards your collection target, and in your manager's report. And if it was cash, it goes into your float by itself — you do not need **Cash into My Float** as well.

Back on My Day

- 1 **Today's collected total has moved** — without a visit being invented to carry it.

Only for money you actually hold

Record it when the payment is in your hand, not when it is promised. A cheque or a UPI payment reaches the bank on its own; only cash goes into your float.

Money you collected — put it in your float

Collected at 32 Diamonds Modern Dental clinic on visit

The cash movement

When you collected **cash** at a clinic, tell the system you are carrying it. On the finished visit, tap the three dots and choose

Cash into My Float.

- 1 **The amount** that moved from the clinic into your hands.
- 2 **Posted** — the office can now see the money is with you.

This does not replace handing the cash over. It records *where the money is right now*, so nobody has to ring you to ask.

Cash only

A cheque or a UPI payment reaches the bank on its own. Only cash goes into your float.

My Cash

- 1 **Your float** — the cash the office has given you, and what is left.

My Day also shows **Cash in hand** near the bottom, and warns you when money you collected has not yet been put into your float.

Still hand the cash over

Recording it is not the same as giving it back. Hand collected cash to the office in the normal way — do not let it sit in your pocket overnight.

My Target

My Target

1 This month's target and what you have achieved.

You cannot type your achievement, and you are not supposed to. It is counted from the visits you close and the orders they produce. Work the round and the number moves.

My Visits

My Visits

Every clinic call you have made, newest first, with what each one produced — the cases collected and the money.

Use it when someone asks about a clinic you visited last week, or to check whether you have already been somewhere this month.

My Day Sheets

The screenshot shows the 'My Dashboard' app interface. At the top, there's a navigation bar with a back arrow, a home icon, and the title 'My Dashboard'. Below the navigation bar is a header section with a purple '+' button on the left and a search icon on the right. The main content area displays a table with the following columns: 'Date', 'Executive', 'Clean', and 'Visits'. The table lists several entries for different dates and executives, including Carrie Helle and Wendi Baltz. A large, stylized icon of a piece of paper with a smiley face is overlaid on the table, indicating that no new sheets are being added.

Date	Executive	Clean	Visits
Sep 14	Carrie Helle	On	6
Sep 11	Carrie Helle	On	0
Aug 31	Wendi Baltz	Off	11
Sep 9	Wendi Baltz	On	24
Oct 10	John Miller	On	45
Aug 20	John Miller	On	36
Sep 27	Carrie Helle	On	27
Sep 30	Carrie Helle	On	31
Aug 31	Wendi Baltz	On	37
Oct 16	Wendi Baltz	On	28

No day sheets yet

At the end of each working day your sheet assembles itself from your visits, travel and attendance — nothing to type but a note.

My Day Sheets

You do not write this. At the end of each working day your sheet builds itself from your visits, your travel and your attendance, and goes to your managers — first the Operational Manager, then the Marketing Manager.

Look here when a day **comes back to you**. The sheet will say what needs correcting. Fix it, and it goes back to them.

Empty on your first day

"No day sheets yet" simply means no day of yours has been closed and sent up yet. It fills in on its own.

12. Ending the day

Closing kilometres

Open **Travel** under DO one last time.

- 1 **End Reading** — the odometer now.
- 2 **End Photo** — photograph it, the same as this morning.

Press **Save** , then **End the Day** .

Cancel Submitted

End Reading

Your claim, worked out for you

- 1 **The distance and the money.** 48,263 – 48,210 = 53 km, and the claim at your rate. You never calculate this.
- 2 The status is now **Submitted** — it is with your manager.

Day ended

Go back to My Day and press **End the day** on the green card.

- 1 It turns back to **Not started yet** and shows the hours you worked.

That is the whole day. Your day sheet is built for you overnight.

13. If something goes wrong

WHAT YOU SEE	WHAT TO DO
"Location is off"	Turn on Location for your browser, wait for the arrow at the top of the phone, tap again. Needed for both I'm Here and Finish.
"This check-in was ... m from the clinic. Add a short reason"	You checked in away from the clinic. Type a short honest reason and you can close the visit.
"GPS not checked — this clinic has no location on the map"	Nobody has pinned this clinic yet. If you are standing in it, open the visit and use Pin Clinic Here . That helps everybody after you.
"Record what happened at the clinic before closing the visit."	Tap at least one outcome under What happened .
"... case(s) have not been submitted"	A slip is still open. Submit it, or delete it if you started it by mistake.
"Say how the payment was received."	You entered an amount but not Cash / Cheque / UPI. Tap one.
"A photo of the opening reading is required."	Photograph the odometer before starting the day.
"Nothing planned for today."	Your round is not set up. Ask your manager to plan your beat.
"Not set up for attendance"	Your login is not linked to an employee record. Ask HR.
A clinic is missing from the list	You only see clinics on your own route. Ask your manager to add it to your beat.
You forgot to write up yesterday	Use the back arrow beside the date on My Day. You can go back a few days — not further, and never forward.

14. Seven things to remember

1. **Start my day first.** Nothing counts until you do.
2. **Press I'm Here at the door**, not in the car.
3. **One slip per patient**, and submit each one before you leave.
4. **Say what happened** before you finish a visit — that is what your day is judged on.
5. **Photograph the odometer** twice a day. No photo, no claim.
6. **Enter cases the same day.** Tomorrow morning it is already a question.
7. **Cash you collected goes into your float** the same day, and to the office as soon as you can. Money taken at a door with no visit behind it goes in through **Cash in** — never invent a visit to carry it.

Ortho Creation · Field Work — Guide for Field Executives.

Every screenshot in this guide is of the real application, taken while performing the steps described — on a copy of the live database, so the clinics, doctors and jobs shown are the real ones. Treat this document accordingly.
