

Bank Reconciliation — User Guide

Module: ortho_bank_reconciliation · **Odoo:** 19 Community · **Menu:** Accounting ► Accounting ► Bank Reconciliation

This guide is for the accounts team. It shows how to check the books against the bank passbook and prepare the Bank Reconciliation Statement (BRS).

In short: **type the passbook's closing balance, work down the passbook one line at a time, and mark the statement reconciled when the difference is zero.** Everything else on the screen is there to help with those three steps.

The screenshots were taken on the staging copy of the live books (CANERA BANK, OrthoCreation), so the figures in them are real.

1. What this module does

Receipts in these books are posted **straight into each bank's ledger account**; no bank statement files are imported. Reconciling a bank therefore means ticking the ledger lines that also appear in the passbook, each with the date the bank cleared it. The module works out the statement:

Line	Meaning
Balance as per books	Every posted line on the bank's ledger account up to the statement date, from any journal, including the opening balance.
Less: deposits not yet credited	Money the books show coming in that the bank has not credited by the statement date.
Add: payments not yet presented	Money the books show going out that the bank has not debited by the statement date.
Books, adjusted	Books – deposits not credited + payments not presented.
Balance as per bank	The passbook's closing balance, typed by you.
Difference	Bank – books adjusted. It must be 0.00 to reconcile.

Posted journal entries are never changed by ticking. Each tick is kept as its own record, with who ticked it and when. An entry cleared *after* the statement date still counts as outstanding on that statement, so an old BRS always reprints exactly as it stood.

2. Before you start

You need	Why
Accounting access (<i>Show Full Accounting Features</i> , or Administrator)	To reconcile, post bank entries and raise queries. Read-only accounting users can view and print.
The passbook or bank statement up to the date you are reconciling	You work down it.
A Bank Charges account and an Interest account	Only for charges or interest the books do not have, and for booking short credits. Set them once on the statement form; later statements of the bank carry them forward, with Short Credits up to .

Only an **accounting Administrator** can reopen a reconciled statement.

3. The banks overview

Accounting ► **Accounting** ► **Bank Reconciliation** opens one card per bank.

[Reconcile](#) [History \(0\)](#) last entry 08/14/2026

- **At the top:** how many banks there are, how many need reconciling (never, or not for 35 days), how many are in progress, and how many outstanding entries are stale.
- **Each card:** the ledger account the bank's entries really post to, the balance as per books today, what is still outstanding, stale entries and the oldest, and where the reconciliation stands.
- **Reconcile / Continue** opens the bank's open statement, or starts one dated today. It never creates a second open statement.
- **History** lists the bank's statements.
- **The small line** on each card is the number of outstanding entries at the end of each of the last 12 weeks, with how much it has changed in the last four (red when growing): whether the bank is being kept up, or falling behind.

The card shows the account the journal's entries **actually** use. For example, CANERA BANK's journal is set to 1050, but its entries are in **1002010 CANERA BANK**. You can change the account on the statement form.

To reconcile **as on a past date** (for example month-end), open the statement form and change the **Statement Date**. Only entries up to that date count.

4. The matching screen at a glance

The screenshot shows the 'Banks / Statement form' for 'CANERA BANK' with a status of 'In progress'. The statement is for '1002010 CANERA BANK' as of '09/15/2026'. At the top right, there are buttons for 'Mark Reconciled' and 'More'. A progress bar indicates '0 of 7789 entries ticked - 0%'. Below this, three summary boxes show: 'Books, adjusted' at '0.00 ₹', 'Balance as per bank' as 'From the passbook', and 'Difference' at '0.00 ₹'. A 'How it is worked out' link is present. A 'First reconciliation of this account' message states that one entry was posted from the general journal, totaling 211,727,197.56 ₹, and provides a 'Tick it' button. The 'Passbook line' section includes a date filter (09/15/2026), tabs for 'Credit' and 'Debit', an 'Amount' field, a 'Balance (optional)' field, a 'Find' button, and checkboxes for 'tick a single match' and '±7 days'. A search bar is available for 'particulars, entry, party or amount'. Below the search bar, there are two main sections: 'Deposits' (money into the bank) and 'Withdrawals' (money out of the bank). The 'Deposits' section shows 7789 outstanding entries, with a list of transactions including 'Opening balance as of 2026-03-31' (211,727,197.56 ₹), 'Transfer from cash (KYLM)' (2,000.00 ₹), 'CUST.IN/2026/3396' (1,500.00 ₹), 'Transfer from BANK(CLT2)' (1,500.00 ₹), 'CUST.IN/2026/3397' (2,000.00 ₹), 'Transfer from BANK(KEK)' (2,000.00 ₹), and 'CUST.IN/2026/3398' (900.00 ₹). The 'Withdrawals' section shows 0 outstanding entries and a message 'Nothing outstanding.'.

From top to bottom:

1. **Header.** The bank, the account, the statement date, and when this account was last reconciled. On the right: **Mark Reconciled** and **More** (printing, Excel, the query letter, keyboard shortcuts, statement settings).
2. **Progress bar.** How many of the entries this statement covers are ticked.
3. **Three figures:** *Books, adjusted, Balance as per bank* (type it here) and *Difference*. **How it is worked out** opens the full six-line statement.
4. **The next step.** One card that tells you what to do now: tick the opening balance, type the bank balance, look at why there is a difference, or mark the statement reconciled.
5. **Passbook line.** Where you type the passbook, one line at a time ([section 6](#)).
6. **Tools:** search, **Lines / Day totals, Filters, Undo**, possible duplicates, and **New bank entry**.
7. **Deposits** (money into the bank) and **Withdrawals** (money out), side by side.

Nothing outstanding.

Each line in the columns shows the particulars, the date, the entry number and the party, and its amount:

- Stale entries show their age in red.
- A line under query shows the query in orange.
- A ticked line shows its cleared date.
- **Click a line's text** to see everything behind it (section 8).
- **Click its box** to tick it.

5. First reconciliation: the opening balance

The first time a bank is reconciled, the opening balance (posted from the general journal on 01-04-2026) looks like a deposit the bank has "not credited". On CANERA BANK that is 211,727,197.56. The next-step card offers to tick it:

1 entry from the general journal, totalling 211,727,197.56 ₹, will be marked cleared on its own date.

Yes, tick them Cancel

Day totals Filters 115 + New bank entry

0 outstanding

If the bank already held that money, which is normal for an opening balance, click **Tick it** and confirm. The card then moves on to the next step.

6. Working down the passbook

This is the heart of the screen. Take the passbook page, and for each line:

1. Set the **date** as printed.
2. Choose **Credit** (money into the bank) or **Debit** (money out).
3. Type the **amount** and press **Enter**.

What happens next depends on what the books have:

Exactly one outstanding entry has that amount near the date (and no whole batch adds up to it): that entry is ticked at once, as cleared on the passbook's date. A message says what was ticked, with an **Undo** button. The cursor goes back to the amount, ready for the next passbook line. Combinations of several entries that happen to add up to the same figure do not stop this; on a busy bank almost any figure can be made up that way.

☐ **Transfer from cash (KYLM)** 2,000.00 ₹

Withdrawals money out of the bank 0 outstanding

Nothing outstanding.

The answers can be:

- **Exact entry** — one outstanding entry of exactly that amount.

- **Batch of N** — a whole batch the bank shows as one figure, however many entries it has:
 - *Cash paid in · KYLM on ...*: every outstanding cash entry of that branch that day;
 - *Everything booked on ...*: every outstanding entry that day.
- **N entries add up** — two to four entries that add up to the figure, like a deposit slip of several cheques. *Same day* is usually the right one. If the same amounts can be made from other entries, it says how many other sets there are.

Nothing fits: the entry is probably not in the books yet. Click **Create the bank entry**: the new-entry form opens with the amount and date filled in ([section 9](#)).

Checking the passbook's balance column

The passbook prints a running balance after every line. Type it into **Balance (optional)** as you go, and each line is checked against the last:

- Start by typing only the balance at the top of the page (no amount) and pressing **Enter**: it is noted as the starting balance.
- Then type each line's amount **and** its balance. If the balance is not the last one plus this credit (or less this debit), a warning says so: a passbook line was skipped, and the gap is its amount. **Look for ...** puts that amount into the passbook line.
- The last balance you typed is shown beside **Find**. While the bank balance has not been entered, the next-step card offers **Use ... from the passbook line**, so the closing balance is filled in without typing it twice.

0 outstanding

Nothing outstanding.

- **Tick, book ... as charges** ticks the entry as cleared on the passbook date **and** posts the shortfall as a bank charge (against the statement's Bank Charges Account), in one click.
- **Tick only** ticks it without booking anything.
- How short counts as "near" is **Short Credits up to** on the statement form (500 by default). A payment the bank debited a little more than the books show is offered the same way.

Settings on the passbook line

Two settings sit at the end of the passbook line:

- **tick a single match** — untick it if you want to see even a single answer before it is ticked;
- **±7 days** — how far from the passbook date to look (3, 7, 15 or 30 days).

7. Ticking entries directly

You can also tick in the columns:

- **Click a line's box** to tick or untick it.
- **Shift-click** a second box to tick (or untick) every line between the two.
- **Tick all shown** ticks every outstanding line on that side that matches the search and filters, each on its own date.
- **Or up to [date] ▶ Tick** ticks every outstanding line on that side booked on or before that date.
- **The cleared date** of a ticked line defaults to the entry's own date. Change it under the line if the bank cleared it on another day. A cleared date after the statement date leaves the line outstanding on this statement, which is correct.
- **Search** looks in particulars, entry number, reference and party. A number such as **1500** also finds that exact amount.

Lines of a reconciled statement show a lock and cannot be changed.

8. Entry details

Click the text of any line (or highlight it and press **Enter**) to open the details panel on the right:

The screenshot displays a software interface for bank reconciliation. On the left, a 'Deposits' list shows various transactions, including an opening balance and several transfers from cash and banks. On the right, an 'Entry details' window is open for a withdrawal of 1,500.00 ₹. This window provides comprehensive information about the entry, including its journal number (CNRB/2026/4650), date (04/01/2026), and status (Posted). It also shows a receipt from DR.SHAFAEEQ and a list of other outstanding entries for the same amount, such as transfers from BANK(CLT2) and CUST.IN/2026/3470.

- **The amount**, the date, the age, and whether it is cleared: when, by whom, and on which statement.
- **Buttons:**
 - **Tick as cleared** or **Untick**;
 - **Query with bank**;
 - **Open entry** — opens the journal entry in a window, without leaving the screen.
- **Journal entry:** its number, journal, date, reference, status, who entered it and when, any note, and **every line** of the entry. The bank line is highlighted, and lines matched to invoices show their matching number.
- **Receipt / Payment:** the payment the entry belongs to, with its method and memo. Click its number to open it.
- **Settled invoices:** the invoices the payment settled, with any amount still due.
- **Party:** the customer or supplier, and their **ledger balance** (owed to us, or in advance). **Show this party's bank entries** filters the columns to them.
- **Other outstanding entries of this amount:** useful when you are not sure which of two similar receipts the bank has. Click one to see its details.

Press **Esc** or click outside the panel to close it.

9. New bank entry

For something the passbook shows and the books do not, click **New bank entry** (or press **n**). The same form opens when the passbook line finds nothing:

cleared 04/01/2026

☐ **Transfer from cash (KYLM)** 2,000.00 ₹
04/01/2026 - CNRB/2026/4541 - 167 days

☐ **CUST.IN/2026/3396** 1,500.00 ₹
04/01/2026 - CNRB/2026/4650 - DR.SHAFAEEQ - 167 days

☐ **Transfer from BANK(CLT2)** 1,500.00 ₹
04/01/2026 - CNRB/2026/4651 - 167 days

Withdrawals money out of the bank 0 outstanding
Nothing outstanding.

What	Other side of the entry
Receipt from a party	The party's receivable account (or the account you pick).
Payment to a party	The party's payable account (or the account you pick).
Other money into the bank	The account you pick (for example a transfer account).
Other money out of the bank	The account you pick.
Bank charge	The Bank Charges Account of the statement.
Interest credited	The Interest Account of the statement.

Fill in the amount, date, party or account, the **particulars** as in the passbook, and the **reference** (UTR or cheque number, used as the entry's reference). Leave **already in the passbook: tick it** on to tick the new entry as cleared; switch it off to post the entry and leave it outstanding.

Post creates a real journal entry in the bank's journal, on the bank's own ledger account, so it appears on the screen at once. The message after posting has an **Open entry** button. The date cannot be after the statement date.

A new entry is not undone by **Undo**. To take it back, reverse the journal entry in Accounting.

10. Queries with the bank, and the query letter

For an entry you cannot place, raise a query in either of two ways:

- click **Query with bank** in its details;
- click the small **flag** that appears beside its amount when you point at the line (or press **q**).

Type what to ask and press **Enter**:

The screenshot displays the 'Accounting' module of a software application. The main window is divided into two panes. The left pane, titled 'Deposits money into the bank', shows a list of transactions. The right pane, titled 'Entry details', provides a detailed view of the selected entry.

Deposits List:

0 outstanding

Nothing matches.

Age — how long entries have been outstanding: 0–7 days, 8–30 days, 31–N days, and **over N days (stale)**. N is 90 unless changed with **Stale After (days)** on the statement form. A cheque in India is valid for three months.

From — where the money came from, read off the particulars:

Button	Lines
Cash paid in	"Transfer from cash (KYLM)", "Transfer to cash (PKD)" and the like. The branch is the name in brackets.
Bank transfers	"Transfer from BANK(EKM1)", "Transfer to BANK(KYLM)" and the like. A missing closing bracket is fine.
Parties	Lines with a customer or supplier.
Other	Everything else, such as the opening balance.
Under query	Lines with a query.
From before the last statement	Entries that were already outstanding when this bank was last reconciled, and still are. These are the ones to chase first. Shown once a statement of the bank has been reconciled.

Active filters show as **pills** under the tools. Click **x** on a pill to remove that filter.

Bank Reconciliation — User Guide · ortho_bank_reconciliation

Page 15 of 30

12. Day totals

The bank usually shows a branch's cash deposit, or a day's transfers, as **one line**, while the books have one entry per receipt. **Day totals** (or **d**) adds the outstanding entries up the same way:

The screenshot shows the OrthoCreation software interface with the 'Day totals' view selected. The top navigation bar includes Accounting, Dashboard, Customers, Vendors, Accounting, Review, Finance Ops, Reporting, and Configuration. A search bar is present with the text 'Search particulars, entry, party or amount'. The main content area is divided into two sections: 'Deposits' and 'Withdrawals'.

Deposits (money into the bank) shows 7782 outstanding. It lists two dates: 04/01/2026 and 04/02/2026. Each date has a table of entries with columns for Particulars, Count, Amount, and a 'Tick day' button.

Particulars	Count	Amount	Tick day
Parties	20	69,200.00 ₹	Tick
Cash paid in - TVM 2	2	24,200.00 ₹	Tick
Bank transfers - GENERAL	2	24,000.00 ₹	Tick
Bank transfers - KTM	1	15,550.00 ₹	Tick
Bank transfers - CLT2	2	5,100.00 ₹	Tick
Bank transfers - EPT	1	4,950.00 ₹	Tick
Bank transfers - KEK	2	4,750.00 ₹	Tick
Bank transfers - PK	2	4,450.00 ₹	Tick
Bank transfers - EKM1	3	3,250.00 ₹	Tick
Bank transfers - PMA	1	2,250.00 ₹	Tick
Cash paid in - KYLM	1	2,000.00 ₹	Tick
Bank transfers - KYLM	2	1,950.00 ₹	Tick
Bank transfers - TVM	2	1,500.00 ₹	Tick
Bank transfers - TCR2	1	1,000.00 ₹	Tick
Bank transfers - TVM2	1	900.00 ₹	Tick
Bank transfers - KLM	1	550.00 ₹	Tick

Withdrawals (money out of the bank) shows 0 outstanding. It states 'Nothing outstanding.'

- **Each day** shows its count, its total and **Tick day**.
- **Each batch in the day** (*Cash paid in · branch, Bank transfers · branch, Parties, Other*) has its own count, total and **Tick**.

When the passbook shows "By cash KYLM 20,000" on a day, check that the *Cash paid in · KYLM* total for that day is 20,000 and click **Tick**. A confirmation says exactly what will be ticked.

13. Undo

Every change to the ticks is remembered: single ticks, ranges, tick all, tick up to a date, day and batch ticks, the opening balance, and changed cleared dates. **Undo** (or **u**) takes back the last one; hovering over it shows what it will undo, who did it and when.

16. Mark Reconciled, and the next statement

When the difference is **0.00** and the bank balance has been typed, the next-step card says the books agree with the bank:

The screenshot displays the 'Banks / Statement form' for 'CANERA BANK' (1002010) as of 09/15/2026. The interface shows a reconciliation summary with a difference of 0.00 ₹. A message states: 'The books agree with the bank. Mark the statement reconciled to lock it.' Below this, there is a 'Passbook line' section with a search bar and filters. The 'Deposits' section (money into the bank) shows 7781 outstanding entries, including an opening balance and several transfers. The 'Withdrawals' section (money out of the bank) shows 0 outstanding entries. A 'Mark Reconciled' button is visible in the top right corner.

20. Rules the module enforces

Rule	Why
Only posted lines of the statement's bank account, dated on or before the statement date, can be ticked or queried.	A statement covers exactly that.
A line can be cleared only once, and carries at most one query.	One clearance, one open question per entry.
Mark Reconciled needs a bank balance and a zero difference.	Otherwise it is not a reconciliation.
Statements of one account are reconciled in date order.	Each builds on the last.
Lines of a reconciled statement are locked; its undo history ends.	What was signed stays as signed.
Undo covers ticks and cleared dates, not posted bank entries.	A posted entry is reversed in Accounting, with its own audit trail.
New bank entries cannot be dated after the statement date.	They would not be on this statement.
Only an Administrator can reopen, latest first.	Control.
Each company sees only its own statements, ticks, undo history and queries.	Multi-company.

21. Questions and troubleshooting

The difference is huge on the first statement. Tick the opening balance from the next-step card ([section 5](#)).

The passbook shows one cash deposit, but the books have a dozen receipts. Type the passbook figure into the passbook line; it finds the branch's day as a batch. Or use **Day totals** ([section 12](#)).

The passbook shows something the books do not have. Type it into the passbook line and click **Create the bank entry**, or use **New bank entry** ([section 9](#)).

Withdrawals are almost empty though the passbook has many debits. Most bank payments have not been entered in these books through the bank account. Post them with **New bank entry** as payments to parties or other money out of the bank.

I ticked the wrong line. Click **Undo** (or press **u**). In a reconciled statement, ask an Administrator to reopen it.

"Mark Reconciled" is greyed out. Either the difference is not zero, or the bank balance has not been typed. The next-step card says which.

Where do I see who entered or ticked an entry? Open its details ([section 8](#)): who entered the journal entry and when, and who cleared the bank line and when.

The screen says it "lost track of its statement". The page was reloaded. Click **Open the banks**, then **Continue**.

22. Glossary

Term	Meaning
BRS	Bank Reconciliation Statement: the proof that the books and the bank agree.
Statement date	The date the passbook balance is taken at.
Passbook line	One line of the passbook, typed into the screen to find its entry.
Cleared	The bank has credited or debited the entry. Cleared date: when.
Outstanding	Booked, but not cleared by the statement date.
Deposit not yet credited	Money in the books' bank account the bank has not credited yet.
Payment not yet presented	Money out of the books' bank account the bank has not debited yet.
Stale	Outstanding for longer than the stale limit (90 days by default).
Short credit	A receipt the bank credited a little less than the books show, usually because it kept its charges.
Carried over	Outstanding since before the last reconciled statement.
Batch	Entries the bank shows as one figure: a branch's cash or transfers for a day, or a whole day.
Query	A note on an entry being followed up with the bank.
Bank entry	A journal entry posted from the screen in the bank's journal.
General journal entry	An entry posted from the general journal, such as the opening balance.
